

Content B

Part B Information and Computer Technologies		
Lu Zhenli, Tian Kai, Mao Limin, Li Bin	Based on double threshold segmentation gait recognition method to design of motion control system for middle size league soccer robots	7
Ping Xiao	A session identification method of Web user based on K-means algorithm	14
Li Guangming, Lu Dai	Analysis of calculating authors' breadth centrality in the collaboration network	19
Chen Keming	Research on the data warehouse testing method in database design process based on the shared nothing frame	23
Mu Ke, Yang Jianhui	The fast multi-level fuzzy edge detection of blurry images	28
Liu Lixia, Mei Hong, Xie Bing	Research on the detection of abnormal traffic for multi-channel network	32
Chen Si	Throughput analysis of network coding in the internet of things	37
Liu Zhilong	Research and implementation on cloud computing security based on HDFS	41
Zhou Wengang, Fu Fen	Research on the decision-based adaptive weighted mean filter algorithm for impulse noise removal	46
Qi Yingchun, Guo Huiling	The location technology of mobile nodes in wireless sensor network	50
Li Xiaokui, Jiang Wei	Adaptive relay selection in cooperative communication based on space time block code	55
Sang Lijun	Wavelet transform based video compression algorithm and its application in video transmission	60
Zhou Ning, Zhang Jing	The application of SpMT WaveCache in performance development of dynamic data flow computer	64
Zhao Guiliang, Zhao Guolin	Research and implementation of virtual tour training system based on virtools	68
Zhao Yan, Chen Yao, Zhang Gang, Wei Wei	Research on the VXI fault diagnosis for computer network based on immune genetic algorithm in process of data transfer	71
Hui Deng	Research on dimension reduction methods facing massive high dimensional web text data based on cloud computing	76
Wu Quinlan, Huang Yanmei	Research on the deployment tactics of workloads confliction based on the neural network in cloud computing	80
Huang Yanmei, Wu Quinlan	Research on pattern recognition method based on the analysis of large big quality	84
Cui Zhongyuan, Zhang Hong	A study on contour extraction method in computer vision measurement technology	88
Jie Zhang, Tiangi Tan	Research on a new generation of wireless internet of things and gateway	92
Hui Feng, Pan Zijin	An Improved K2DPCA dimensional reduction method for hyper spectral remote sensing image	96
Li Linlin	The technology of marking animation based on virtual reality	100
Dong Yanyan, Li Qiong, Li Li	Research on the retransmit intention of negative word-of-mouth based on interpersonal trust in mobile internet community	105
Nie Jing	Design and realization of platform of mass data processing based on high-performance computer	111
Li Jiaxian	Study on the theoretical model based on image processing control system	115
HongLing Lv, WenYan Qiu	An analysis on the current development and risk control of the internet financial of China	119
Huanhai Yang	Research of license plate recognition and location based on SUSAN corner detection	124
Authors' Index		131
Cumulative Index		132
