

Content C

PART C Operation Research and Decision Making		
Lu Cai, Xiangyun Yu	Fuzzy comprehensive evaluation over the differences and similarities of financial and accounting functions in enterprises	9
Yafei Deng	The application of computer aided design in art and design	14
Sheng You	Research on university library information level measurement based on genetic algorithms and neural networks	19
Hongzhi Zhao	Explore application of hierarchical approach in College physics experiment teaching	23
Weiwei Li	The characteristics of immaterial society and its influence on the development of art design	27
Qian Zhou	Integrating intangible cultural heritage with instructional methodologies at vocational educational institutions - an exploration of instructions on the case of Kaifeng city and nearby	30
Xiaoxin Li	A Novel prediction model for champions' scores of men's 110- meter hurdle in Olympic Games	34
Jiangfeng Li	The comparison of the undergraduates' learning values on the basis of different educational systems	38
Hua Chen	The model research of the teachers' knowledge management support system based on Web	44
Hongte Chen, Li Zhang	Study on English MOOC online learning monitor system and model	47
Yuting Han	Study on arts online education of knowledge comprehensive evaluation model based on BPNN	52
Zhenhui Dong, Fang Liu	Study on tourism crisis alarming model based on data mining	57
Hua Sun	Research on digital marketing system data model based on cloud computing	62
Shanshan Chen	The research of English massive open online course based on virtual technology	67
Wei Liu	Investigation and prevention measures of the epidemiology of common sport injury in college physical education	71
Guangyu Peng	Research on the construction of teacher knowledge management support system based on WEB	74
Ai-hua Ye, Yin-e Chen	The research into the financial dynamic style using a state-space model	79
Jia He	A research on RMB exchange rate based on big mac index empirical analysis	83
Dong Wang	Evaluation and development countermeasures on reverse logistics operations under E-commerce environment	87
Mu Mu, Jing Zhang	Teaching practice research of ideological and political classes based on the means of multimedia	91
Yan Ma	Analysis based on the teaching pressure and living pressure model of China's college teachers	95

Li Pan	An analysis of response coupling relationship between supply-demand inbound tourism flow drive and urban destinations	99
Chunhui Wang	Production of English vocabulary teaching courseware based on multimedia technology	103
Long Chen	Mathematical theory development model in public sports education for university students	107
Weiping Cao, Guangchun Zhou	Analysis on the application of Internet-based exercise prescription teaching method in PE class	112
Jun Chen	Relationship between strengthening internet-based physical teaching and the improvement of excellence rate of students' physique health tests	115
Xiaoping Gou, Zhenqiang Xiong, Pingsheng Lu, Mingyu Yuan	Feasibility analyzing for shoulder joint training device promoting in primary and secondary schools	118
YiChen Liu, Chunbo Li, Wensi Pei	Research on issues of endowment insurance for urban villagers in Shijiazhuang city	122
Zhilei Zheng	Innovation of tennis teaching at College's PE major based on multiple intelligence theory	128
Xinghua Hu, Xiaoning Zhu, Bing Long	Control model of bus priority at signal intersection considering green loss equilibrium	132
Jiaojin Ci	Efficient big data processing strategy based on Hadoop for electronic commerce logistics	140
Hui Song, Ning Zhang	Research on the impact of rural tourism on economic growth and employment level based on VAR model	145
Yaqing Gu, Cong Guo	On the evaluation of sustainable development of marine economy based on AHP - a case study of the New District in Zhoushan Islands	150
Lu Dai, Guangming Li	An improved degree measurement index based on the social network	155
Bing Zheng	Research on the design of B/S structure sports equipment rental system of school based on local fractional algorithm	160
Qihua Xu	Research on a new membership functions based on fuzzy SVM	164
W.H. Chen	Power systems adaptability evaluation using neural network	167
Tao Lu, Xiaojun Zhang	Application research on long jump training and guidance based on data mining	173
Yuhai Miao, Jing Chen	Predicting the High-rise building construction project safety risk based on QPSO-SVM model	179
Lifang Tang	Microblog oriented user interest analysis and implementation in personalized information service	183
Cai Hui	Optimal control strategy of rural medical insurance system based on elderly people's satisfaction	189
Zhong Qi	Risk evaluation of oversea investment of Chinese enterprises based on fuzzy-AHP	193
Juanying Yang, Xiaoyan Miao, Jun Yang	Research on several factors affecting the structural stability of lace material and clothing effect and its solutions	198
Binbin Yan	Study on public art design methods of metro space with Zhengzhou Metro line 1 as an example	201
Jun Zhang	A study of the construction of teaching staff of He Nan private universities	205
Xu Junjie, Wu Min	Convenient pickup point in e-commerce logistics: a theoretical framework for motivations and strategies	209

Xue Zhao	One improved P2P electronic commerce trust model	214
Li Hua, Dou Shiting, Sun Qiubai	An Empirical study on affecting factors of stock returns based on the structural equation model-manufacturing as the example	219
Li Yanbin, Song Sihan, Zhang Zezhong, Xie Ruyi	Agricultural drought disaster risk evaluation in Guizhou	223
Shoujun Chen, Kun Chen, Zhongfu Tan	A risk-reward balancing model of generation side and purchasing side based on optimized total risk-reward	229
Guoliang Zhao, Guolin Zhao	Research on the key technology of urban planning virtual emulation system base on open GL	234
Yang Yang	Optimization of shortest path of multiple transportation model based on cost analyses	237
Jiujin Li, Fusheng Wang, Chang Xu	Earning quality, Venture capital and Firm value	242
Guoming Du	The fund input mechanism of compulsory education for migrant workers children in China: Guangzhou evidence	248
Xiaodong Wang	Integration of enterprise marketing practice and school education based on diversified network teaching	253
Weifeng Zhang	An analysis of psychological stress model of college students' employment	258
Mei Ren	English vocabulary teaching based on multimedia technology	263
Yingbin Shang	Application of SECI model in ideological and political education of university students	266
Yanling Deng	Study on the application of context in college English translation teaching	271
Jigang Zhao, Wei Song	Comparative study of traditional tennis teaching method and modern tennis teaching method	274
Liu Jun	The competition pattern of World Olympic Winter Games and the achievement outlook of Chinese superiority project	280
Author's Index		285
Cumulative Index		286
