

Content

Editors' Remarks		5
Nanoscience and Nanotechnology		
N Mykytenko, D Fink, A Kiv	Generalized model of pulsating track device	7
T Lobanova-Shunina, Yu Shunin	Nanotinking and nanoeducation: nanoscientific literacy for responsible consumerism	13
Mathematical and Computer Modelling		
J Zhou, W Q Ma, J Y Miao	Supplies transportation planning in power grid urgent repair based on hierarchical genetic algorithm	25
Zengqiang Ma, Yacong Zheng, Sha Zhong, Xingxing Zou	Study of maneuvering target tracking algorithm based on Kalman filter and ANFIS	31
Ji Mingyu, Li Yanmei, Chen Zhiyuan	The property verification methods of complex stochastic system based on directed graph	38
Zhang YongHeng, Zhang Feng	Research on the smart wireless sensor perception system and its application based on Internet of Things	44
Huang Li	Data cleansing base on subgraph comparison	52
Li Gongfa, Liu Jia, Jiang Guozhang, Kong Jianyi, Xie Liangxi, Xiao Wentao, Zhang Yikun, Cheng Fuwei	Numerical simulation of flow, temperature and phase fields in U71Mn rail-head quenching process	61
Information Technologies		
Ranran Man, Dongsheng Zhou, Qiang Zhang	An improved collision detection algorithm based on OBB	71
Liu Hong Xia, Zhang Feng	Precision agriculture compressed sensing and data fusion algorithm for wireless sensor networks	80
Yun-Feng Wang, Wei Cheng	Structural design and active control simulation for double beam actuator based on ANSYS	85
Weihua Yuan, Hong Wang	Using two-stage non-negative matrix factorization for topic recommendation in online social networks	93

Operation research and decision making		
D Zagulova, R Muhamedyev, I Ualiyeva, A Mansharipova, E Muhamedyeva	Optimization of Medical Information Systems by Using Additional Factors	100
M Fay, V Grekul, N Korovkina	IT investments justification based on the business driver tree	109
Bang-Jun Wang	CBM-based integrated management information system design for mine construction enterprises	115
Yinzhou Zhu, Hui Yang, Baolin Yin	Method for defining multiple homogeneous activities in distributed workflow management system	121
Wang Mingpeng, Sun Qiming	Empirical research on existing quantity of small and medium-sized enterprises in China, based on system dynamics	129
Wang Fen	The buyback contract coordination for a logistics service supply chain	136
Bing Wang, Tinggui Chen, Guanglan Zhou, Chonghuan Xu	Research on resource-constrained project scheduling method based on heuristic priority rules	143
Xie Yuanmin	Optimization research of material inventory management based on genetic algorithm	151
Yehong Han, Lin Du	An update algorithm of decision rules in expert systems based on rough sets theory	156
Authors' Index		164
Cumulative Index		165
Book Review		
T Lobanova-Shunina	Iveta Kovalčíková, Juraj Kresila Selected contexts of reform of national education programme in England and Slovakia	171
