PART C Operation Research and Decision Making

The development of inference machine model for vocation psychology based on rough set theory 9
CaiHong Li

Application of optimized PLS-SEM measurement model and empirical research on Chinese cultural and creative industries competitive formation mechanism 16
Zeng Tao, Wangbing Qi

Crisis prediction in e-learning through data mining technology: an empirical investigation 23
Ke Zhu, Jin Zhang

US army aviation's battlefield POL assurance model simulation based on system dynamics 28
Jian Tang, Qingzhong Zhou, Peng Xu

The application of improved back propagation neural network model 34
Fang Li, Changze Wu

A hybrid minimum spanning tree method for traveling salesman problem 40
Hehua Li, Wei Xiong, Yong Wang

A secure authentication scheme based on fuzzy extractor 46
Lihua Zhang, Yaoping Nie

Financial distress prediction model of dual constraint LS-SVM based on neighborhood rough set index optimization 56
Guanhua Zhao, Tanglu, Lin Gao

Analysis of land-use change and its mechanism based on graphical information and statistical model 63
Jiafu Liu, Ping Wang, Bai Zhang

Simulation study on short-term load forecasting of electric power parameter optimization based on phase-space reconstruction theory 69
Huanyu Cai Juhui Cao, Zhiqiang He

The research of the interval density cluster method for piecewise linear membership function determination 76
Liu Qi, Li Sheng

Using data mining technologies to find learning activity rules for online learning 79
Ke Zhu

Modelling and simulating adoption behaviour of enterprise environmental innovation technology under niche strategy 84
Aiwu Zhao, Hongjun Guan

Fault diagnosis of analogue circuits based on improved genetic algorithm and neutral-network 89
Wang Mingfang, Wang Jie, Zhao Xuejun, Yuan Xiujiu

Research the sweet spot on a baseball bat based on optimization algorithms 96
Ke Zhu, Jin Zhang, Tianyi Wang, Miao Zhu

The research of camping along the big long river based on optimized model 103
Jin Zhang

Study on prediction and spatial variation of $PM_{2.5}$ pollution by using improved BP artificial neural network model of computer technology and GIS 107
Ping Zhang, Tao Zhang, Liang He, Cailiang Wei, Sui Luo, Huan Miao, Peishu Huo

E-commerce pattern analysis and strategy of Tibet lamp in Yanchi county 116
Chen Wang, Jianbei Li, Shuping Wen

Modelling and simulating for coupling development mechanism of regional logistics-economic complex system 120
Yaowu Wang, Zhibin Lu

A method of short term traffic flow prediction that based on the time series theory 125
Mingjun Deng

Challenges made by digital transmission pattern to the Chinese society in the internet era 130
Yu Cao, Meishi-Jiang, Liangwei-Chen, Guisheng Zhang, Guizhen-Wang

Design of the differential chaos shift keying communication system based on DSP builder 138
Zhiping Liu, Jinhua Zhang, Hanyu Liu

Design and implement of a university archives management model 144
Xinxin Yu

Research on eco-community comprehensive evaluation model based on improved fuzzy method under the circumstance of new type urbanization development 149
Liya Fan

Apriori algorithm in the improvement and implementation of e-commerce based on data mining 154
Gan Tao

Special and temporal effects of the urban rail transit on the real estate values 160
Hongping Wang, Qian Huang, Hailing Sun

Cooperative capability evaluation model of construction organization to implement cleaner production 166
Feng Xu, Chen Jianguo, Wang Yujing

Significant multiple regression algorithm of construction occupation based on micro-optical characteristics and matrix correlation degree 171
Na Lu, Tianyan Wu

Energy consumption optimization method of cloud computing platform based on customer satisfaction 179
Chuansheng Xie, Xinyu Ren, Gerilemanda

Choreography modelling based on π calculus 187
Jiulei Jiang, Jiao Zhang, Wenxing Bao

BPM Software Adoption in Enterprises based on TOE Framework and IS Success Model 195
Yusi He, Wukui Wang

Teaching Management System Based on Particle Swarm Algorithm 201
Wei Xie

Similarity measure based on characteristic values for intuitionistic trapezoidal fuzzy numbers and its multicriteria decision-making method 205
Shapu Ren

The Study on Evaluation of the Tourism Economics Impaction 210
He Huang

Analyzing Model of Enterprises Cluster Learning Competence in Airport Economic Zone based on Self-Organization Theory 216
Yang Changhui

A framework for improving urban noise map 222
Zhang Bin, Hu Wencheng,Peng Linhui

A rational threshold signature with hierarchical structure 227
Xiurong Li, Yongquan Cai, Yali Liu

Research on construction exhibition integrated information service system in airport economic zone 232
Yang Changhui Wang Xi

Classification algorithm of regression support vector machine and its application to make a mixed refrigerant in ground source heat pump system 239
Yan Manfu, Wang Jiuhai

The Performance Evaluation of the Listed Security Companies in China Based on the DEA Model 245
Yan-liang Zhang, Ran-ran Chu, Xiao-qi Zhao

Privacy Preservation in Social Network Based on Anonymization Techniques 249
Pingshui Wang, Xuedong Zhang, Pei Huang

Changes in Science and Technology Policy for the Equipment Manufacturing Industry Collaborative Innovation Impact Prediction 254
Zhaoji Yu, Songtao Zhou

Quantitative analysis of translation texts 260
A Kiv, L Bodnar, E Sedov, O Britavska, N Yaremchuk, M Yakovleva

E-Commerce Recommendation System based on MapReduce 264
Wei Zhao, Hong Tao Zhang

Research on Land Utilization Intensity Control and Urban Design Fusion Mechanism Based on Spatial Hierarchy Coupling Model 270
Quanhua Hou, Shuang Xia, Wenhui Wang

Analysis of the guiding role of skill factor model in college talent entrepreneurship 279
Yunli Bai, Miao Miao, Yaowei Li

Symbiosis Model of Rural Tourist Attraction Based on Sustainable Development 283
Lanlan Yi

Evaluation Analysis of College English Standard Language Ability Based on Environment Adaptive Model 287
Guilan Jiao

Establishing of Basketball Coach Evaluation System Based on the Grey Relevance Evaluation Model and Analytic Hierarchy Model 291
Jirong Zeng

The Sharing Mechanism Study of IT Enterprises' Knowledge Alliance 295
Haiwen Yang, Changqi Tao

An Analysis on the Facilitating Effect of Sino-Burmese oil and gas pipelines on the Regional Economy by System Dynamics 301
Zhang Hailiang, Lu Man, Lin Yaxi

A logical framework for describing machine knowledge 307
Yuanxiu Liao, Shengming Zhou, Zhixin Li

The construction and application of impact model for social networks 314
Liguo Huang, Lufang Mi

Short Term Forecasting for Wind Power Based on Cluster Analysis 321
Yang Gao, Jing Xing, Aoran Xu, Liu Zhang, Gang Wang, Quanping Zou

Comparisons of Firefly Algorithm with Chaotic Maps 326
Shoubao Su, Yu Su, Mingjuan Xu

The Study on Collaborative based Marketing Sales Strategy 333
Chen Qun, Li Fang

Intermediary Role of Job Burnout between Individual-Organization Matching and Turnover Intention Based on Regression Analysis 339
Li Hui, Wang Qun, Chen Lin

Blind Sources Separation Based on Short-Time Discrete Cosine Transforms 346
Zeng Yanni, Zhang YujieQi Rui
